Office Action Summary

Art Unit: 1651

Claims 1-23 are presented for examination on the merits.

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-23 are rendered vague and indefinite for failing to recite proper Markush groups. Wherein the language "selected from one or more of the group comprising" is open language and Markush language is required to be closed language. Therefore, it's suggested to change the phraseology to --selected from the group consisting of-- in the claims. Further, the claims should clearly describe the percentages in terms by weight percent in place of merely "by weight". One may ask "by weight of what". Thus, the metes and bounds of the claims can not be determined.

3. Claims 15-18 and 20-23 are objected to under 37 CAR 1.75(c) as being in improper form because a multiple dependent claim should be alternatively dependent only. See MPEP § 608.01(n).

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re*

Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).
5.

A timely filed terminal disclaimer in compliance with 37 CAR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CAR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CAR 3.73(b).

6. Claims 1-23 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of copending Application No. 09/690,419. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims appear to only differ with respect to scope of the claimed subject matters. Therefore, the copending claims would have made obvious the instantly filed claims as both have identical subject matter with the exception of their scope for content in weight percent.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The claims appear to be free of the prior art.
